

Jaw-dropping print quality and speed

When choosing the appropriate 3D printer for a lab environment let alone your dental clinic, it is essential that you put reliability and productivity in focus next to justifiable costs.

Unlike most 3D printer producers, we have built our VOXEL L Mark IV 3D printer from the ground up with the speciality requirements of the dental industry, that is why they excel in accuracy and repeatability.

With the VOXEL.IOS intraoral scanner and the VOXELTK.live online platform, our Mark IV 3D printers make up a powerful combination for chairside digital impression taking, 3D CAD design and in-office 3D printing.

Make the best out of the latest digital dental technologies by choosing our VOXELTEK Flow 180 bundles.

A powerful platform to support your work.

Book a designer

VOXELTEK.live

An online platform with on-demand dental CAD design services

In the form of our Flow 180 for Clinics bundles, we have not only teamed up two of the most productive digital dental devices in an unprecedentedly affordable bundle, but we added so great value on the software side that they truly make up a never before seen combination.

There is no need for any kind of installation: VOXELTEK.live is an online platform that runs right in your browser, thus avoiding any software compatibility issues.

You'll be able to organize all your scans coming from your VOXEL.IOS intraoral scanner.

Through the platform, you'll be able to access our online CAD design services that is there for you flexibly at any time when needed.

This way, we are breaking down the largest barrier for digital technologies and 3D printing conquering dental clinics: the often underestimated necessity of in-house CAD design resources.

VOXELTEK.live also handles file processing for 3D printing and organizes all your cases over an intuitive user interface.

Key Features

- ✓ Processing platform for VOXELTEK 3D printers
- ✓ Access to VOXELTEK CAD Design services
- ✓ Knowledge base and video tutorials
- ✓ Easy support ticketing system
- ✓ Unlimited number of users per organization
- ✓ Organized view for all your cases
